The contents of this report relate only to the matters which have come to our attention, which we believe need to be reported to you as part of our audit planning process. It is not a comprehensive record of all the relevant matters, which may be subject to change, and in particular we cannot be held responsible to you for reporting all of the risks which may affect the Authority or all weaknesses in your internal controls. This report has been prepared solely for your benefit and should not be quoted in whole or in part without our prior written consent. We do not accept any responsibility for any loss occasioned to any third party acting, or refraining from acting on the basis of the content of this report, as this report was not prepared for, nor intended for, any other purpose.

Grant Thornton UK LLP is a limited liability partnership registered in England and Wales: No.OC307742. Registered office: 30 Finsbury Square, London, EC2A 1AG. A list of members is available from our registered office. Grant Thornton UK LLP is authorised and regulated by the Financial Conduct Authority. Grant Thornton UK LLP is a member firm of Grant Thornton International Ltd (GTIL). GTIL and the member firms are not a worldwide partnership. Services are delivered by the member firms. GTIL and its member firms are not agents of, and do not obligate, one another and are not liable for one another's acts or omissions.

# Significant improvements from the Financial Reporting Council's (FRC) quality inspection

On 29 October, the FRC published its annual report setting out the findings of its review of the work of local auditors. The report summarises the results of the FRC's inspections of twenty audit files for the last financial year. A link to the report is here: [FRC AQR Major Local Audits October 2021](#)

Grant Thornton are one of seven firms which currently delivers local audit work. Of our 330 local government and NHS audits, 87 are currently defined as 'major audits' which fall within the scope of the AQR. This year, the FRC looked at nine of our audits.

## Our file review results

The FRC reviewed nine of our audits this year. It graded six files (67%) as 'Good' and requiring no more than limited improvements. No files were graded as requiring significant improvement, representing an impressive year-on-year improvement. The FRC described the improvement in our audit quality as an 'encouraging response by the firm to the quality findings reported in the prior year.' Our Value for Money work continues to be delivered to a high standard, with all of the files reviewed requiring no more than limited improvement. We welcome the FRC findings and conclusions which demonstrate the impressive improvement we have made in audit quality over the past year.

The FRC also identified a number of good practices including effective challenge of management's valuer, use of an auditor's expert to assist with the audit of a highly specialised property valuation, and the extent and timing of involvement by the audit partner on the VFM conclusion.

Our results over the past three years are shown in the table below:

Grade	Number 2018/19	Number 2019/20	Number 2020/21
Good with limited improvements (Grade 1 or 2)	1	1	6
Improvements required (Grade 3)	2	5	3
Significant improvements required (Grade 4)	1	0	0
Total	4	6	9

## Our continued commitment to Audit quality and continuous improvement

Our work over the past year has been undertaken during the backdrop of COVID, when the public sector has faced the huge challenge of providing essential services and helping safeguard the public during the pandemic. Our NHS bodies in particular have been at the forefront of the public health crisis. As auditors we have had to show compassion to NHS staff deeply affected by the crisis, whilst staying focused on the principles of good governance and financial management, things which are more important than ever. We are very proud of the way we have worked effectively with audited bodies, demonstrating empathy in our work whilst still upholding the highest audit quality.

# Significant improvements from the Financial Reporting Council's (FRC) quality inspection (cont.)

Over the coming year we will make further investments in audit quality including strengthening our quality and technical support functions, and increasing the level of training, support and guidance for our audit teams. We will address the specific improvement recommendations raised by the FRC, including:

- Enhanced training for local auditors on key assumptions within property valuations, and how to demonstrate an increased level of challenge
- Formalising our arrangements for the consideration of complex technical issues by Partner Panels.

As part of our enhanced Value for Money programme, we will focus on identifying the scope for better use of public money, as well as highlighting weaknesses in governance or financial stewardship where we see them.

## Conclusion

Local audit plays a critical role in the way public sector audits and society interact, and it depends on the trust and confidence of all those who rely on it. As a firm we're proud to be doing our part to promote good governance, effective stewardship and appropriate use of public funds.

# Key matters

## Factors

### Her Majesty's Inspectorate of Constabulary and Fire & Rescue Service (HMICFRS)

The Authority's Her Majesty's Inspectorate of Constabulary and Fire and Rescue Services (HMICFRS) 2021/22, Effectiveness, Efficiency and People report concluded that in each of the three areas Effectiveness, Efficiency and People the Authority was rated as "Requires Improvement" compared to the 2018/19 report which rated the Authority as "Good" in relation to "Effectiveness" and "Requires Improvement" in relation to "Efficiency and People", compared to an expected grade of "good".

This report, covering the second full inspection, was published on 15 December 2021. In its' response to the first inspection report, from December 2018, the Authority produced a detailed response / action plan, progress against which was reported quarterly to Members. We expect that the same approach will be taken this time.

### Financial position

The Authority is forecasting expenditure for the year of £35.23m compared to a revised budget at quarter two of £35.35m. As in previous years, in-year finances have been well controlled. However, our value for money planning work has identified that the Medium Term Financial Plan, approved in February 2022, shows "Structural Budget Gaps" of £0.238m (2022/23); £0.133m (23/24) and £0.402m (24/25) - all to be funded from reserves, primarily the Budget Reduction Reserve. This reserve will then have decreased from £1.428m to £0.779m. This is around two years at the rate of £0.400m a year. This represents a significant risk as the Authority needs to be able to balance its budget without the ongoing use of reserves.

### Recovery from Covid 19 pandemic

The Authority continues to respond well to the impact of Covid-19. Internally, business continuity has been good, with officers working from home and from Hindlip as required. As a significant majority of the workforce is fire fighters, who have needed to be at fire stations, the Authority has been able to deliver services as "normal".

## Our response

- As a firm, we are absolutely committed to audit quality and financial reporting in the local government sector. Our proposed work and fee, as set further in our Audit Plan, has been agreed with the Director of Finance.
- We will consider the Authority's response to the HMICFRS report as part of our Value for Money work.
- We will consider your arrangements for managing and reporting your financial resources as part of our work in completing our Value for Money work.
- In our 2020/21 Auditors' Annual Report, presented to the Audit & Standards Committee on 19 January 2022, we identified two improvement recommendations. We will follow up progress against these as part of our Value for Money work.
- In our 2020/21 Audit Findings Report, presented to the Audit & Standards Committee on 19 January 2022, we identified four recommendations. We will follow up progress against these as part of our financial statements opinion work.

# Introduction and headlines

## Purpose

This document provides an overview of the planned scope and timing of the statutory audit of Hereford & Worcester Fire Authority ('the Authority') for those charged with governance.

## Respective responsibilities

The National Audit Office ('the NAO') has issued a document entitled Code of Audit Practice ('the Code'). This summarises where the responsibilities of auditors begin and end and what is expected from the audited body. Our respective responsibilities are also set out in the Terms of Appointment and Statement of Responsibilities issued by Public Sector Audit Appointments (PSAA), the body responsible for appointing us as auditor of Hereford & Worcester Fire Authority]. We draw your attention to both of these documents.

## Scope of our audit

The scope of our audit is set in accordance with the Code and International Standards on Auditing (ISAs) (UK). We are responsible for forming and expressing an opinion on the Authority's financial statements that have been prepared by management with the oversight of those charged with governance (the Audit & Standards Committee); and we consider whether there are sufficient arrangements in place at the Authority for securing economy, efficiency and effectiveness in your use of resources. Value for money relates to ensuring that resources are used efficiently to maximise the outcomes that can be achieved.

The audit of the financial statements does not relieve management or the Audit & Standards Committee of your responsibilities. It is the responsibility of the Authority to ensure that proper arrangements are in place for the conduct of its business, and that public money is safeguarded and properly accounted for. We have considered how the Authority is fulfilling these responsibilities.

Our audit approach is based on a thorough understanding of the Authority's business and is risk based.

## Significant risks

Those risks requiring special audit consideration and procedures to address the likelihood of a material financial statement error have been identified as:

- Under ISA (UK&I) 240 it is presumed that the risk of management over-ride of controls is present in all entities.
- The Authority's pension fund net liability as reflected in its balance sheet represent significant estimates in the financial statements.
- The valuation of the Authority's land and buildings.

We will communicate significant findings on these areas as well as any other significant matters arising from the audit to you in our Audit Findings (ISA 260) Report.

## Materiality

We have determined planning materiality to be £0.8m (PY £0.8m) for the Authority, which equates to 2% of your prior year gross expenditure. We are obliged to report uncorrected omissions or misstatements other than those which are 'clearly trivial' to those charged with governance. Clearly trivial has been set at £0.4m (PY £0.04m).

## Value for Money arrangements

Our risk assessment regarding your arrangements to secure value for money have identified the following risk of significant weakness:

- Financial sustainability.

## Audit logistics

Our interim visit took place in April and our final visit will take place in August to November. Our key deliverables are this Audit Plan, our Audit Findings Report and Auditor's Annual Report.

Our fee for the audit will be £43,361 (PY: £44,311) for the Authority, subject to the Authority delivering a good set of financial statements and working papers.

We have complied with the Financial Reporting Council's Ethical Standard (revised 2019) and we as a firm, and each covered person, confirm that we are independent and are able to express an objective opinion on the financial statements..

# Significant risks identified

Significant risks are defined by ISAs (UK) as risks that, in the judgement of the auditor, require special audit consideration. In identifying risks, audit teams consider the nature of the risk, the potential magnitude of misstatement, and its likelihood. Significant risks are those risks that have a higher risk of material misstatement.

Risk	Reason for risk identification	Key aspects of our proposed response to the risk
The revenue cycle includes fraudulent transactions (rebutted)	Under ISA (UK) 240 there is a rebuttable presumed risk that revenue may be misstated due to the improper recognition of revenue.	<p>Having considered the risk factors set out in ISA240 and the nature of the revenue streams at the Authority, we have determined that the risk of fraud arising from revenue recognition can be rebutted, because:</p> <ul style="list-style-type: none"> <li>• there is little incentive to manipulate revenue recognition</li> <li>• opportunities to manipulate revenue recognition are very limited</li> <li>• the culture and ethical frameworks of local authorities, including Hereford &amp; Worcester Fire Authority, mean that all forms of fraud are seen as unacceptable.</li> </ul> <p>Therefore we do not consider this to be a significant risk for Hereford &amp; Worcester Fire Authority.</p>
Fraudulent expenditure recognition (rebutted)	In line with the Public Audit Forum Practice Note 10, in the public sector, auditors must also consider the risk that material misstatements due to fraudulent financial reporting may arise from the manipulation of expenditure recognition (for instance by deferring expenditure to a later period).	<p>We have rebutted this risk for Hereford &amp; Worcester Fire Authority because:</p> <ul style="list-style-type: none"> <li>• expenditure is primarily related to employee costs</li> <li>• opportunity to manipulate contract variations is low.</li> </ul> <p>We therefore do not consider this to be a significant risk for Hereford &amp; Worcester Fire Authority.</p> <p>We will continue to review material expenditure transactions as part of our audit ensuring that it remains appropriate to rebut the risk of expenditure recognition for Hereford &amp; Worcester Fire Authority.</p>

# Significant risks identified

Risk	Reason for risk identification	Key aspects of our proposed response to the risk
<b>Management over-ride of controls</b>	<p>Under ISA (UK) 240 there is a non-rebuttable presumed risk that the risk of management over-ride of controls is present in all entities.</p> <p>We therefore identified management override of control, in particular journals, management estimates and transactions outside the course of business as a significant risk, which was one of the most significant assessed risks of material misstatement.</p>	<p>To address this risk we will:</p> <ul style="list-style-type: none"> <li>• evaluate the design effectiveness of management controls over journals</li> <li>• analyse the journals listing and determine the criteria for selecting high risk unusual journals</li> <li>• test unusual journals recorded during the year and after the draft accounts stage for appropriateness and corroboration</li> <li>• gain an understanding of the accounting estimates and critical judgements applied made by management and consider their reasonableness with regard to corroborative evidence</li> <li>• evaluate the rationale for any changes in accounting policies, estimates or significant unusual transactions.</li> </ul>

# Significant risks identified

Risk	Reason for risk identification	Key aspects of our proposed response to the risk
Valuation of pension fund net liability	<p>The Authority's pension fund net liability, as reflected in its balance sheet as the net defined benefit liability, represents a significant estimate in the financial statements.</p> <p>The pension fund net liability is considered a significant estimate due to the size of the numbers involved (£408m in the Authority's prior year balance sheet) and the sensitivity of the estimate to changes in key assumptions.</p> <p>The methods applied in the calculation of the IAS 19 estimates are routine and commonly applied by all actuarial firms in line with the requirements set out in the Code of practice for local government accounting (the applicable financial reporting framework). We have therefore concluded that there is not a significant risk of material misstatement in the IAS 19 estimate due to the methods and models used in their calculation.</p> <p>The source data used by the actuaries to produce the IAS 19 estimates is provided by administering authorities and employers. We do not consider this to be a significant risk as this is easily verifiable.</p> <p>The actuarial assumptions used are the responsibility of the entity but should be set on the advice given by the actuary. A small change in the key assumptions (discount rate, inflation rate, salary increase and life expectancy) can have a significant impact on the estimated IAS 19 liability. In particular the discount and inflation rates where, in the prior year, the actuary indicated that a 0.5% change in the discount rate assumption would have approximately £40m effect on the liability and a 0.5% change in the inflation rate (salary increase) assumption would have approximately £6.5m. We have therefore concluded that there is a significant risk of material misstatement in the IAS 19 estimate due to the assumptions used in their calculation. With regard to these assumptions we have therefore identified valuation of the Authority's pension fund net liability as a significant risk.</p>	<p>To address this risk we will:</p> <ul style="list-style-type: none"> <li>• update our understanding of the processes and controls put in place by management to ensure that the Authority's pension fund net liability is not materially misstated and evaluate the design of the associated controls</li> <li>• evaluate the instructions issued by management to their management expert (an actuary) for this estimate and the scope of the actuary's work</li> <li>• assess the competence, capabilities and objectivity of the actuary who carried out the Authority's pension fund valuation</li> <li>• assess the accuracy and completeness of the information provided by the Authority to the actuary to estimate the liability</li> <li>• test the consistency of the pension fund asset and liability and disclosures in the notes to the core financial statements with the actuarial report from the actuary</li> <li>• undertake procedures to confirm the reasonableness of the actuarial assumptions made by reviewing the report of the consulting actuary (as auditor's expert) and performing any additional procedures suggested within the report</li> <li>• obtain assurances from the auditor of Worcestershire Pension Fund as to the controls surrounding the validity and accuracy of membership data; contributions data and benefits data sent to the actuary by the pension fund and the fund assets valuation in the pension fund financial statements.</li> </ul>

# Significant risks identified

Risk	Reason for risk identification	Key aspects of our proposed response to the risk
Valuation of land and buildings	<p>The Authority revalues its land and buildings on an annual basis. This valuation represents a significant estimate by management in the financial statements due to the size of the numbers involved and the sensitivity of this estimate to changes in key assumptions. Additionally, management will need to ensure the carrying value in the financial statements is not materially different from the current value or the fair value (for surplus assets) at the financial statements date, where a rolling programme is used.</p> <p>Our work in this area in 2020/21 took longer than we had anticipated. This is because the valuations were completed by Place Partnership Limited, and then revisited by West Mercia Police and Crime Commissioner valuers, with some being amended. The supporting evidence for some of the valuations was not readily available and took time to obtain. When the evidence and supporting information was received we found that, for several properties, it was inconsistent with our expectations. Further challenge of the valuer work resulted in all of the property valuations being revisited. The value of operational property assets reduced in value by £5.055m and surplus assets increased by £0.645m. The net effect is a decrease in property valuations of £4.410m. Of this, £1.835m was taken to the Cost of Services in the CIES, and £2.575m was taken to the revaluation reserve.</p> <p>While we understand that arrangements for the valuation of land and buildings have been strengthened for 2021/22, in light of the challenges noted in the first paragraph above, we have therefore identified valuation of land and buildings, particularly revaluations and impairments, as a significant risk, which was one of the most significant assessed risks of material misstatement.</p>	<p>To address this risk we will:</p> <ul style="list-style-type: none"> <li>• evaluate management's processes and assumptions for the calculation of the estimate, the instructions issued to valuation experts and the scope of their work</li> <li>• evaluate the competence, capabilities and objectivity of the valuation expert</li> <li>• write to the valuer to confirm the basis on which the valuation was carried out</li> <li>• challenge the information and assumptions used by the valuer to assess completeness and consistency with our understanding</li> <li>• test revaluations made during the year to see if they have been input correctly into the Authority's asset register</li> <li>• evaluate the assumptions made by management for those assets not revalued during the year and how management has satisfied themselves that these are not materially different to current value at year end.</li> </ul>

# Accounting estimates and related disclosures

The Financial Reporting Council issued an updated ISA (UK) 540 (revised): *Auditing Accounting Estimates and Related Disclosures* which includes significant enhancements in respect of the audit risk assessment process for accounting estimates. We identified one recommendation in our 2020/21 audit in relation to the Authority's estimation process for the valuation of land and buildings.

## Introduction

Under ISA (UK) 540 (Revised December 2018) auditors are required to understand and assess an entity's internal controls over accounting estimates, including:

- The nature and extent of oversight and governance over management's financial reporting process relevant to accounting estimates;
- How management identifies the need for and applies specialised skills or knowledge related to accounting estimates;
- How the entity's risk management process identifies and addresses risks relating to accounting estimates;
- The entity's information system as it relates to accounting estimates;
- The entity's control activities in relation to accounting estimates; and
- How management reviews the outcomes of previous accounting estimates.

As part of this process auditors also need to obtain an understanding of the role of those charged with governance, which is particularly important where the estimates have high estimation uncertainty, or require significant judgement.

Specifically do Audit & Standards Committee members:

- Understand the characteristics of the methods and models used to make the accounting estimates and the risks related to them;
- Oversee management's process for making accounting estimates, including the use of models, and the monitoring activities undertaken by management; and
- Evaluate how management made the accounting estimates?

# Accounting estimates and related disclosures

## Additional information that will be required

To ensure our compliance with this revised auditing standard, we will be requesting further information from management and those charged with governance during our audit for the year ended 31 March 2022.

Based on our knowledge of the Authority we have identified the following material accounting estimates for which this is likely to apply:

- Valuations of land and buildings properties
- Depreciation
- Valuation of defined benefit net pension fund liabilities
- Fair value estimates in respect of surplus assets and PWLB borrowing

## The Authority's Information systems

In respect of the Authority's information systems we are required to consider how management identifies the methods, assumptions and source data used for each material accounting estimate and the need for any changes to these. This includes how management selects, or designs, the methods, assumptions and data to be used and applies the methods used in the valuations.

When the models used include increased complexity or subjectivity, as is the case for many valuation models, auditors need to understand and assess the controls in place over the models and the data included therein. Where adequate controls are not in place we may need to report this as a significant control deficiency and this could affect the amount of detailed substantive testing required during the audit.

If management has changed the method for making an accounting estimate we will need to fully understand management's rationale for this change. Any unexpected changes are likely to raise the audit risk profile of this accounting estimate and may result in the need for additional audit procedures.

We are aware that the Authority uses management experts in deriving some of its more complex estimates, e.g. asset valuations and pensions liabilities. However, it is important to note that the use of management experts does not diminish the responsibilities of management and those charged with governance to ensure that:

- All accounting estimates and related disclosures included in the financial statements have been prepared in accordance with the requirements of the financial reporting framework, and are materially accurate;
- There are adequate controls in place at the Authority (and where applicable its service provider or management expert) over the models, assumptions and source data used in the preparation of accounting estimates.

### Estimation uncertainty

Under ISA (UK) 540 we are required to consider the following:

- How management understands the degree of estimation uncertainty related to each accounting estimate; and
- How management address this estimation uncertainty when selecting their point estimate.

For example, how management identified and considered alternative, methods, assumptions or source data that would be equally valid under the financial reporting framework, and why these alternatives were rejected in favour of the point estimate used.

The revised standard includes increased emphasis on the importance of the financial statement disclosures. Under ISA (UK) 540 (Revised December 2018), auditors are required to assess whether both the accounting estimates themselves and the related disclosures are reasonable.

Where there is a material uncertainty, that is where there is a significant risk of a material change to the estimated carrying value of an asset or liability within the next year, there needs to be additional disclosures. Note that not all material estimates will have a material uncertainty and it is also possible that an estimate that is not material could have a risk of material uncertainty.

Where there is material estimation uncertainty, we would expect the financial statement disclosures to detail:

- What the assumptions and uncertainties are;
- How sensitive the assets and liabilities are to those assumptions, and why;
- The expected resolution of the uncertainty and the range of reasonably possible outcomes for the next financial year; and
- An explanation of any changes made to past assumptions if the uncertainty is unresolved.

### Planning enquiries

As part of our planning risk assessment procedures we have prepared and agreed with management a separate document (Informing the audit risk assessment 2021-22) that will be being presented to the Audit & Standards Committee alongside this audit plan.

### Further information

Further details on the requirements of ISA (UK) 540 (Revised December 2018) can be found in the auditing standard on the Financial Reporting Council's website:

[https://www.frc.org.uk/getattachment/0fa69c03-49ec-49ae-a8c9-cc7a2b65382a/ISA-\(UK\)-540\\_Revised-December-2018\\_final.pdf](https://www.frc.org.uk/getattachment/0fa69c03-49ec-49ae-a8c9-cc7a2b65382a/ISA-(UK)-540_Revised-December-2018_final.pdf)

---

# Other matters

## Other work

In addition to our responsibilities under the Code of Practice, we have a number of other audit responsibilities, as follows:

- We read your Narrative Report and Annual Governance Statement to check that they are consistent with the financial statements on which we give an opinion and our knowledge of the Authority.
- We carry out work to satisfy ourselves that disclosures made in your Annual Governance Statement are in line with requirements set by CIPFA.
- We carry out work on your consolidation schedules for the Whole of Government Accounts process in accordance with NAO group audit instructions.
- We consider our other duties under legislation and the Code, as and when required, including:
  - giving electors the opportunity to raise questions about your 2021/22 financial statements, consider and decide upon any objections received in relation to the 2021/22 financial statements;
  - issuing a report in the public interest or written recommendations to the Authority under section 24 of the Local Audit and Accountability Act 2014 (the Act).
  - application to the court for a declaration that an item of account is contrary to law under section 28 or a judicial review under section 31 of the Act
  - issuing an advisory notice under section 29 of the Act
- We certify completion of our audit.

## Other material balances and transactions

Under International Standards on Auditing, "irrespective of the assessed risks of material misstatement, the auditor shall design and perform substantive procedures for each material class of transactions, account balance and disclosure". All other material balances and transaction streams will therefore be audited. However, the procedures will not be as extensive as the procedures adopted for the risks identified in this report.

# Materiality

## The concept of materiality

Materiality is fundamental to the preparation of the financial statements and the audit process and applies not only to the monetary misstatements but also to disclosure requirements and adherence to acceptable accounting practice and applicable law. Misstatements, including omissions, are considered to be material if they, individually or in the aggregate, could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

## Materiality for planning purposes

We have determined financial statement materiality based on a proportion of the gross expenditure of the Authority for the financial year. In the prior year we used the same benchmark. Materiality at the planning stage of our audit is £0.8m (PY £0.8m) for the Authority, which equates to 2% of your gross expenditure for the prior year. We design our procedures to detect errors in specific accounts at a lower level of precision. We have set a separate lower materiality level for the disclosure note on remuneration of individual senior managers. In view of the sensitivity of this note to the reader of the accounts, we have set a materiality level of 2% of the senior officers note. In the prior year the total of this note was £0.647m. Applying 2% gives £0.013m.

We reconsider planning materiality if, during the course of our audit engagement, we become aware of facts and circumstances that would have caused us to make a different determination of planning materiality.

## Matters we will report to the Audit & Standards Committee

Whilst our audit procedures are designed to identify misstatements which are material to our opinion on the financial statements as a whole, we nevertheless report to the Audit & Standards Committee any unadjusted misstatements of lesser amounts to the extent that these are identified by our audit work. Under ISA 260 (UK) 'Communication with those charged with governance', we are obliged to report uncorrected omissions or misstatements other than those which are 'clearly trivial' to those charged with governance. ISA 260 (UK) defines 'clearly trivial' as matters that are clearly inconsequential, whether taken individually or in aggregate and whether judged by any quantitative or qualitative criteria. In the context of the Authority, we propose that an individual difference could normally be considered to be clearly trivial if it is less than £0.04m (PY £0.04m).

If management have corrected material misstatements identified during the course of the audit, we will consider whether those corrections should be communicated to the Audit & Standards Committee to assist it in fulfilling its governance responsibilities.

## Prior year gross operating costs

£41.962m Authority

■ [Forecast/Prior year] gross operating costs

## Materiality

# IT audit strategy

In accordance with ISA (UK) 315, we are required to obtain an understanding of the information systems relevant to financial reporting to identify and assess the risks of material misstatement. As part of this we obtain an understanding of the controls operating over relevant Information Technology (IT) systems i.e., IT general controls (ITGCs). Our audit will include completing an assessment of the design of ITGCs related to security management; technology acquisition, development and maintenance; and technology infrastructure. Based on the level of assurance required for each IT system the assessment may focus on evaluating key risk areas ('streamlined assessment') or be more in depth ('detailed assessment').

The following IT systems have been judged to be in scope for our audit and based on the planned financial statement audit approach we will perform the indicated level of assessment:

IT system	Audit area	Planned level IT audit assessment
Technology One	Financial reporting	<ul style="list-style-type: none"> <li>Streamlined ITGC design assessment</li> </ul>

# Value for Money arrangements

## Approach to Value for Money work for 2021/22

The National Audit Office (NAO) issued updated guidance for auditors in April 2020. The Code requires auditors to consider whether the body has put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources. When reporting on these arrangements, the Code requires auditors to structure their commentary on arrangements under three specified reporting criteria. These are as set out below:

### Improving economy, efficiency and effectiveness

Arrangements for improving the way the body delivers its services. This includes arrangements for understanding costs and delivering efficiencies and improving outcomes for service users.

### Financial Sustainability

Arrangements for ensuring the body can continue to deliver services. This includes planning resources to ensure adequate finances and maintain sustainable levels of spending over the medium term (3-5 years)

### Governance

Arrangements for ensuring that the body makes appropriate decisions in the right way. This includes arrangements for budget setting and management, risk management, and ensuring the body makes decisions based on appropriate information

# Risks of significant VFM weaknesses

As part of our planning work, we considered whether there were any risks of significant weakness in the body's arrangements for securing economy, efficiency and effectiveness in its use of resources that we needed to perform further procedures on. The risks we have identified are detailed in the first table below, along with the further procedures we will perform. We may need to make recommendations following the completion of our work. The potential different types of recommendations we could make are set out in the second table below.

## Risks of significant weakness

Those risks requiring audit consideration and procedures to address the likelihood that proper arrangements are not in place at the body to deliver value for money.

### Financial Sustainability

The Fire Authority Medium Term Financial Plan, approved in February 2022, shows "Structural Budget Gaps" of £0.238m (2022/23); £0.133m (23/24) and £0.402m (24/25) - all to be funded from reserves, primarily the Budget Reduction Reserve. This reserve will then have decreased from £1.428m to £0.779m. This is around two years at the rate of £0.400m a year. This represents a significant risk as the Authority needs to be able to balance its budget without the ongoing use of reserves.

To address this risk we will review the long term plans to ensure a balanced budget can be achieved without the need to use reserves.

## Potential types of recommendations

A range of different recommendations could be made following the completion of work on risks of significant weakness, as follows:

### Statutory recommendation

Written recommendations to the body under Section 24 (Schedule 7) of the Local Audit and Accountability Act 2014. A recommendation under schedule 7 requires the body to discuss and respond publicly to the report.

### Key recommendation

The Code of Audit Practice requires that where auditors identify significant weaknesses in arrangements to secure value for money they should make recommendations setting out the actions that should be taken by the body. We have defined these recommendations as 'key recommendations'.

### Improvement recommendation

These recommendations, if implemented should improve the arrangements in place at the body, but are not made as a result of identifying significant weaknesses in the body's arrangements

## Avtar Sohal, Key Audit Partner

Avtar's role will be to:

- be a key contact for the Chief Fire Officer, the Director of Finance & Assets (Treasurer) and the Audit & Standards Committee; and
- take overall responsibility for the delivery of a high quality audit, meeting the highest professional standards and adding value to the Authority.

## Neil Preece, Audit Manager

Neil's role will be to manage the delivery of a high quality audit, meeting the highest professional standards and adding value to the Authority.

## Harvinder Panesar, Audit Incharge

Harvinder's role will be to:

- be the day to day contact for Authority finance staff;
- take responsibility for ensuring there is effective communication and understanding by finance team of audit requirements;
- focus on the more technical aspect of the audit and to discuss emerging national technical matters as they arise and deal with technical matters raised by the you throughout the year in a timely manner.

## Audited body responsibilities

Where audited bodies do not deliver to the timetable agreed, we need to ensure that this does not impact on audit quality or absorb a disproportionate amount of time, thereby disadvantaging other audits. Where the elapsed time to complete an audit exceeds that agreed due to a client not meeting its obligations we will not be able to maintain a team on site. Similarly, where additional resources are needed to complete the audit due to a client not meeting their obligations we are not able to guarantee the delivery of the audit to the agreed timescales. In addition, delayed audits will incur additional audit fees.

## Our requirements

To minimise the risk of a delayed audit, you need to ensure that you:

- produce draft financial statements of good quality by the agreed timetable you have agreed with us, including all notes, the Narrative Report and the Annual Governance Statement
- ensure that good quality working papers are available at the start of the audit, in accordance with the working paper requirements schedule that we have shared with you
- ensure that the agreed data reports are available to us at the start of the audit and are reconciled to the values in the accounts, in order to facilitate our selection of samples for testing
- ensure that all appropriate staff are available on site throughout (or as otherwise agreed) the planned period of the audit
- respond promptly and adequately to audit queries.

# Audit fees

In 2017, PSAA awarded a contract of audit for Hereford & Worcester Fire Authority to begin with effect from 2018/19. The fee agreed in the contract was £25,311. Since that time, there have been a number of developments, particularly in relation to the revised Code and ISA's which are relevant for the 2021/22 audit.

Across all sectors and firms, the FRC has set out its expectation of improved financial reporting from organisations and the need for auditors to demonstrate increased scepticism and challenge and to undertake additional and more robust testing, as detailed on pages 11-12 in relation to the updated ISA (UK) 540 (revised): Auditing Accounting Estimates and Related Disclosures.

As a firm, we are absolutely committed to meeting the expectations of the FRC with regard to audit quality and public sector financial reporting. Our proposed work and fee for 2021/22, as set out below, has been agreed with the Director of Finance.

	Actual Fee 2019/20	Actual Fee 2020/21	Proposed fee 2021/22
Hereford & Worcester Fire Authority Audit	£35,145	£44,311	£43,361
Total audit fees (excluding VAT)	£35,145	£44,311	£43,361

## Assumptions

In setting the above fees, we have assumed that the Authority will:

- prepare a good quality set of financial statements, supported by comprehensive and well presented working papers which are ready at the start of the audit
- provide appropriate analysis, support and evidence to support all critical judgements and significant judgements made during the course of preparing the financial statements
- provide early notice of proposed complex or unusual transactions which could have a material impact on the financial statements.

## Relevant professional standards

In preparing our fee estimate, we have had regard to all relevant professional standards, including paragraphs 4.1 and 4.2 of the FRC's [Ethical Standard \(revised 2019\)](#) which stipulate that the Engagement Lead (Key Audit Partner) must set a fee sufficient to enable the resourcing of the audit with partners and staff with appropriate time and skill to deliver an audit to the required professional and Ethical standards.

# Independence and non-audit services

## Auditor independence

Ethical Standards and ISA (UK) 260 require us to give you timely disclosure of all significant facts and matters that may bear upon the integrity, objectivity and independence of the firm or covered persons, relating to our independence. We encourage you to contact us to discuss these or any other independence issues with us. We will also discuss with you if we make additional significant judgements surrounding independence matters.

We confirm that there are no significant facts or matters that impact on our independence as auditors that we are required or wish to draw to your attention. We have complied with the Financial Reporting Council's Ethical Standard (Revised 2019) and we as a firm, and each covered person, confirm that we are independent and are able to express an objective opinion on the financial statements. Further, we have complied with the requirements of the National Audit Office's Auditor Guidance Note 01 issued in May 2020 which sets out supplementary guidance on ethical requirements for auditors of local public bodies.

The Audit Manager, Neil Preece, has been Manager for seven years. If the Authority was not a public sector client, the firm's policy rotation for this role is 10 years. However, in the public sector the firm requires permission for extensions to be sought after seven years. The firm's internal Ethics Function and Public Sector Audit Appointments (PSAA) have approved the extension for one year.

We confirm that we have implemented policies and procedures to meet the requirements of the Ethical Standard. For the purposes of our audit we have made enquiries of all Grant Thornton UK LLP teams providing services to the Authority.

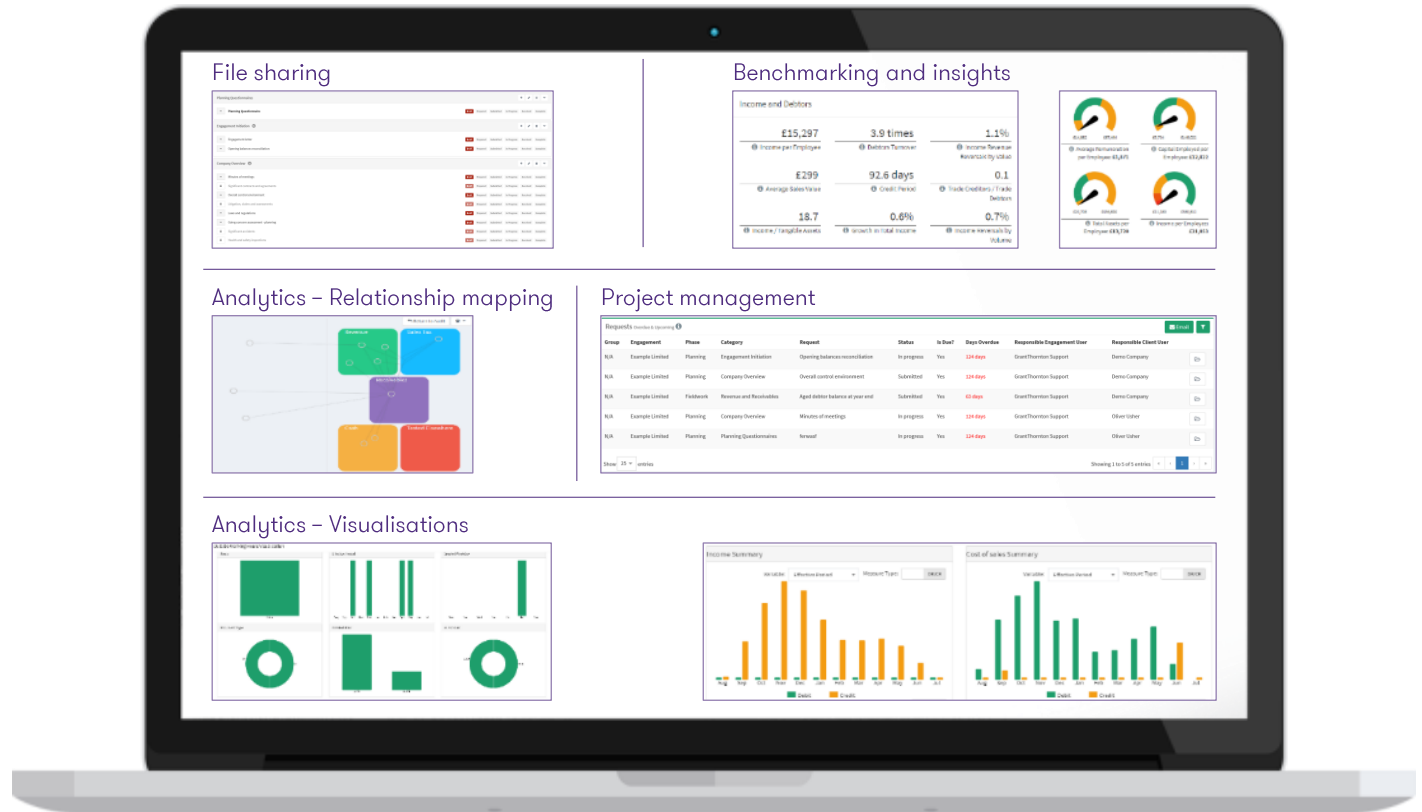

## Other services

No other services provided by Grant Thornton were identified.

# Our digital audit experience

A key component of our overall audit experience is our comprehensive data analytics tool, which is supported by Inflo Software technology. This tool has a number of key functions within our audit process:

Function	Benefits for you
Data extraction	Providing us with your financial information is made easier
File sharing	An easy-to-use, ISO 27001 certified, purpose-built file sharing tool
Project management	Effective management and oversight of requests and responsibilities
Data analytics	Enhanced assurance from access to complete data populations

Grant Thornton's Analytics solution is supported by Inflo Software technology

# Our digital audit experience

A key component of our overall audit experience is our comprehensive data analytics tool, which is supported by Inflo Software technology. This tool has a number of key functions within our audit process:

## Data extraction

- Real-time access to data
- Easy step-by-step guides to support you upload your data

## File sharing

- Task-based ISO 27001 certified file sharing space, ensuring requests for each task are easy to follow
- Ability to communicate in the tool, ensuring all team members have visibility on discussions about your audit, reducing duplication of work

## Project management

- Facilitates oversight of requests
- Access to a live request list at all times

## Data analytics

- Relationship mapping, allowing understanding of whole cycles to be obtained quickly
- Visualisation of transactions, allowing easy identification of trends and anomalies

## How will analytics add value to your audit?

Analytics will add value to your audit in a number of ways. We see the key benefits of extensive use of data analytics within the audit process to be the following:

### Improved fraud procedures using powerful anomaly detection

Being able to analyse every accounting transaction across your business enhances our fraud procedures. We can immediately identify high risk transactions, focusing our work on these to provide greater assurance to you, and other stakeholders.

Examples of anomaly detection include analysis of user activity, which may highlight inappropriate access permissions, and reviewing seldom used accounts, which could identify efficiencies through reducing unnecessary codes and therefore unnecessary internal maintenance.

Another product of this is identification of issues that are not specific to individual postings, such as training requirements being identified for members of staff with high error rates, or who are relying on use of suspense accounts.

### More time for you to perform the day job

Providing all this additional value does not require additional input from you or your team. In fact, less of your time is required to prepare information for the audit and to provide supporting information to us.

Complete extracts from your general ledger will be obtained from the data provided to us and requests will therefore be reduced.

We provide transparent project management, allowing us to seamlessly collaborate with each other to complete the audit on time and around other commitments.

We will both have access to a dashboard which provides a real-time overview of audit progress, down to individual information items we need from each other. Tasks can easily be allocated across your team to ensure roles and responsibilities are well defined.

Using filters, you and your team will quickly be able to identify actions required, meaning any delays can be flagged earlier in the process. Accessible through any browser, the audit status is always available on any device providing you with the information to work flexibly around your other commitments.

# Appendix 1: Progress against prior year audit recommendations

We identified the following issues in our 2020/21 audit of the Authority's financial statements, which resulted in four recommendations being reported in our 2020/21 Audit Findings Report. We will follow up progress against these as part of our year end audit.

Assessment	Issue and risk previously communicated	Recommendations
High	<p><b>Property valuations</b></p> <p>Our audit work took significantly longer than planned. This was partly due to the changeover in valuers, but also because supporting information was not readily available.</p> <p>There is a risk that property valuations cannot be supported.</p>	<p>The Authority needs to ensure that the external valuer obtains sufficient appropriate evidence and documentation of thought processes, readily available, to support to valuations and provide evidence to audit in a timely manner.</p> <p><b>Management response</b></p> <p>The Authority recognizes the shortcomings in the previous process which was further complicated by the total closure of Place Partnership Ltd (PPL) (the valuer) within days of providing the original valuations. Going forward professional valuation services will be provided under a new arrangement under the Police &amp; Crime Commissioner. This relationship has been used to correct and review the valuations initially carried out by PPL and has resulted in the valuer and the Authority having a much fuller understanding of the valuation process and potential issues arising. The Authority will in future be provided with sufficient documentation to allow appropriate challenge where necessary. The experience in resolving the 2021/22 issues has given confidence that future arrangements are sufficiently robust.</p>
Medium	<p><b>Member Data</b></p> <p>The Member Data provided to the Government Actuary Department (GAD) for them to prepare the Fire Fighters' Pension Scheme liability estimate was out of date. Officers spent a very considerable amount of time in reconciling figures which audit then used to sample test pension deductions for new joiners.</p> <p>There is a risk that the pension scheme liability is misstated.</p>	<p>The Authority needs to ensure that information provided to the Government Actuary Department (GAD) is up to date, complete and accurate.</p> <p><b>Management response</b></p> <p>The Authority will be reviewing the process for providing and reconciling data provided to GAD co-ordinating Finance, Payroll and Pensions team inputs.</p>

# Appendix 1: Progress against prior year audit recommendations

Assessment	Issue and risk previously communicated	Recommendations
Medium	<p><b>Fair Value of Public Work Loan Board borrowing</b></p> <p>Our audit work identified that the Fair Value calculations for Public Works Loan Board (PWLB) borrowing did not use an approach recognized by the CIPFA Code.</p> <p>While this does not impact on the amount actually borrowed, it does indicate the impact that new loans would have if taken out on 31 March.</p>	<p>The Authority needs to ensure that the Fair Value of PWLB borrowing is correctly calculated. Many authorities use expert advisers to provide this information for them.</p> <p><b>Management response</b></p> <p>The Authority acknowledge that the valuation method used initially has not kept pace with the requirements of the Code, and will look at alternative ways to provide this information. This will include the potential use of expert advisers, although the value for money benefit of paying an external fee to provide a figure for a note to the Accounts will have to be judged.</p>
Medium	<p><b>Expenditure recognition</b></p> <p>Our audit work identified that the Authority was not consistently applying its accounting policies in terms of recognising expenditure where invoices spanned more than one financial year.</p> <p>While the impact in 2020/21 is immaterial, it took more audit and officer time to quantify the impact. The risk that, in future years, the impact could be material, remains.</p>	<p>The Authority needs to ensure that it consistency applies it accounting policies.</p> <p><b>Management response</b></p> <p>The apparent inconsistency is an error of omission rather than of commission. A small number of invoices that should have adjusted were missed. Processes will be amended to try to reduce this in future but, in relation to the small size of the team and the tight timescales for the initial sign off of the Accounts (31 May), it cannot be guaranteed individual invoices may still be missed. However as stated the impacts are not material.</p>
